

# Flu & U:

How you and your friends can stay healthy

Give your hands a good wash as often as you can. It's the best way to fight the flu!

If you can't wash your hands, use a hand sanitizer.

Cough or sneeze into a tissue or your sleeve, not your hand. Throw away the tissue right away.

Protect your friends - stay at home when ill and tell them not to visit when you're sick. Keep in touch online.
